

CUSTOM PACKAGING / SELECTED COLLECTION

Packaging

made around your product.

Gift boxes. Retail cartons. Protective inserts. Displays.

HIONE INDUSTRY

Structure, presentation and inner fit in one packaging brief.

01 / GIFT PRESENTATION

Rigid gift boxes

Round silhouettes, ribbon details and coordinated gift collections.

**H031 Round window box**

A visible assortment in a round format.

**H032 Handled round boxes**

An upright gift presentation.

**H034 Marble-look round boxes**

A shared graphic appearance across sizes.

**H035 Ribbon gift box**

A lid-and-base format with ribbon detail.

Coordinate the inside

Confirm the usable dimensions, product layout, inner support and preferred opening feel.

02 / RETAIL PRESENTATION

Printed folding cartons

Printed paperboard formats for branded products and retail assortments.

**H011 Natural & white cartons**

A family of folding carton proportions.

**H012 White carton range**

Coordinated dimensions and structures.

**H013 Retail window carton**

A carry handle and front viewing area.

**H014 Printed retail packs**

Branded formats for smaller products.

Start with the product

Share the size, weight, sales channel, preferred artwork and quantity.

03 / KRAFT-LOOK PACKAGING

Window boxes in natural tones.

A kraft-look surface combined with a window for product visibility.

**H022 Retail window carton**

A large front viewing area.

**H023 Window box family**

Several proportions with a shared look.

**H011 Natural-tone cartons**

Enclosed options alongside window formats.

**H040 Outer-carton coordination**

Plan the retail and shipping packs together.

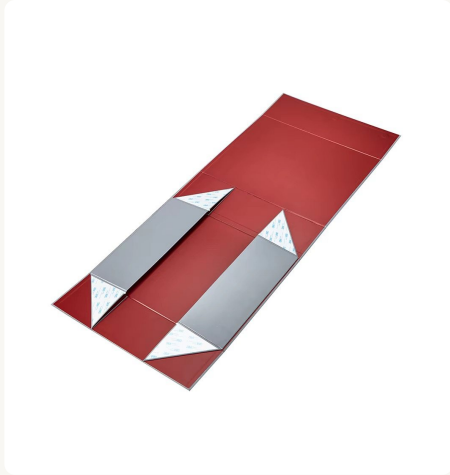

Confirm the paper

Agree the actual paper grade, appearance, window construction and packed sample.

04 / BOX STRUCTURE

Fold flat. Open to present.

Assembly views and finished formats for folding gift-box presentation.

H025

H026

H030

H028

H027

H029

Compare the flat panels, opening sequence and assembled appearance. Confirm assembly steps and storage requirements before production.

Sample review

Check crease positions, corner alignment, closure and product access.

05 / CARRY PRESENTATION

Leather-look gift carriers.

A structured carry format for gift assortments and presentation sets.

H015 GIFT CARRIER FAMILY

A range of carry-ready proportions with a leather-look exterior. Confirm the actual surface construction, internal support and handle loading for your application.

Choose the carrying format

Share the packed weight, product arrangement, handle preference and presentation requirements.

06 / CLEAR PRESENTATION

Keep the contents in view.

Cylindrical presentation packs in a range of proportions.

H024 CLEAR CYLINDRICAL PACKS

Tall and shallow formats provide different presentation options. Agree the resin, wall thickness, lid fit and intended use for the actual project.

Specify the application

Product dimensions, intended contact conditions and destination requirements guide material selection.

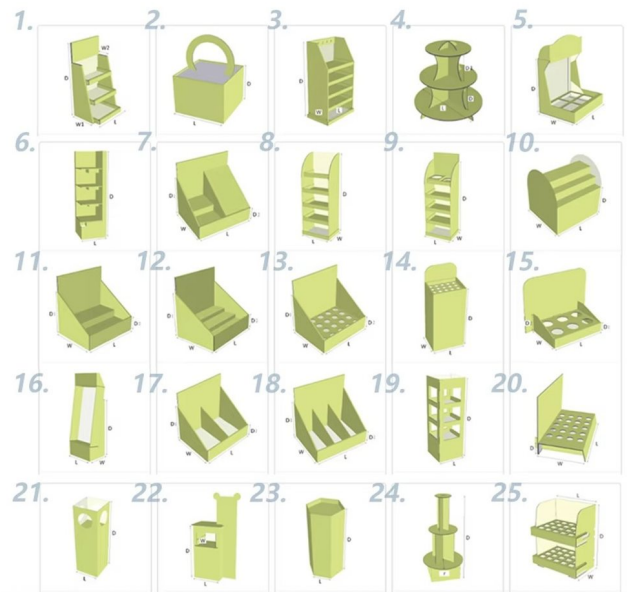

07 / RETAIL DISPLAY

A clear place for each product.

Counter displays and structure references for organising retail assortments.

**H036 COUNTER DISPLAY**

For more box styles, please contact customer service for customization.

**H038 STRUCTURE GUIDE**

Choose a display layout around the product dimensions, facing count and available retail space. Compartment trays, raised headers and floor-display structures provide different ways to organise an assortment.

Retail checks

Review loaded stability, product access, shelf dimensions and the assembly method.

08 / OUTER PACKAGING

Plan the complete shipping pack.

Corrugated carton families for grouped products and outer protection.

**H039 CARTON SIZE FAMILY****H040 OPEN CARTONS**

Confirm inner dimensions, packed weight, closure and the required board grade. Review the product and inner protection together with the carton before confirming the packing method.

Quote the loaded pack

Share the product layout, items per carton, destination and quantity.

09 / PAPER INTERIORS

Honeycomb protective inserts

Shaped paper interiors for compartments, product positioning and protective fit.

**H003 Gift-set compartments**

Organise several items in one pack.

**H004 Bottle-shaped cavity**

A product outline built into the insert.

**H006 Bottle presentation**

Coordinate the bottle and outer pack.

**H008 Multi-cavity layout**

Separate openings for an assortment.

Design the fit

Review the contact points, product removal and clearance inside the box.

10 / PAPER PACKAGING OPTIONS

Paper protection, many formats.

Pads, separators and shaped interiors for a complete product layout.

Discuss the product geometry, packed weight and required protection before selecting the paper structure.

11 / INNER PACKAGING

Compare the insert options.

Choose the presentation surface and cavity approach around the actual product.

Packaging Insert Options

Flocked Thermoformed Insert

Foam Insert

Flocked EVA Insert

Paperboard Insert

Thermoformed Insert

EPE Foam Insert

Flocked thermoformed inserts, foam, flocked EVA, paperboard, thermoformed plastic and EPE foam offer different approaches to fit and presentation.

Material & fit review

Confirm the material grade, cavity layout, contact areas and removal clearance on a physical sample.

START A PACKAGING PROJECT

Send us your product brief.

Use a photo reference from this collection to identify the style you prefer.

01 Product

Photos or drawings, dimensions, weight and items per set.

02 Packaging

Box structure, insert layout, artwork direction and material preference.

03 Order

Quantity, delivery destination and target schedule.

04 Approval

Confirm the structure, artwork, material and physical sample before production.
